

Warranty Statement for ViuLite®

During a period of 5-years from the date of manufacture, depending on the type of unit construction and the use to which the unit is put, ViuLite® insulating glass units (without capillary breather tubes) are warranted not to develop, under normal conditions, material obstruction of vision as a result of dust or film formation on the internal glass surface caused by failure of the hermetic seal other than through glass breakage. All components located *inside* the insulating glass unit are covered by a 5-year warranty. Motorization elements and any other components located *outside* the insulating glass unit are covered by a 2-year warranty. This warranty does not apply to glass breakage, vandalism, and replacement and labor costs.

This warranty is effective only if installation is made in accordance with our specific instructions and does not apply to units damaged by improper handling or installation. This represents Unicel's maximum liability. Any units failing to comply with terms of this warranty will be replaced, EXWORKS our plant. This warranty does not apply to replacement units beyond the original 5-year period to which the original unit is subjected. Unicel will not be liable for any other expenses involved in the removal of defective units, installation of replacement units, or any other incidental or consequential damages.

This warranty shall be void if the unit is subjected to abnormal stresses from the load application of heat, excessive vibration, building or foundation movement; if glazed with materials which do not remain resilient for the life of the warranty, or if the methods and materials used in glazing the unit do not completely repel water and protect polysulfide sealant from UV rays for the life of the warranty. Unicel reserves the right to inspect any part or unit, which is allegedly defective.
