

# Unicel Wins Architectural Record's Product of the Year Award for ViuLite® Blinds-within-Glass Product

ViuLite® selected by jury of architects as winner in the "Openings" category

**MONTREAL, CANADA – December 13, 2017** – Unicel Architectural, manufacturer of vision and daylight control solutions, today announced that its ViuLite® integrated blinds product has won an Architectural Record's Products of the Year award. ViuLite® was selected by a jury of architects as a winner in the "Openings" Category. Each year, the Record Products competition invites a jury of six professionals to identify the best products of the year, rating entries for innovation, usefulness, and aesthetics.

"Architectural Record's Products of the Year awards highlight the best doors, windows and hardware in the industry," said Jean-François Couturier, CEO of Unicel Architectural. "We are truly honored to be recognized as a winner in the Openings category. Together with our partner Pellini, our ViuLite® internal blinds are designed to combine high performance with low maintenance. Additionally, ViuLite® now comes with operators that are treated with Sanitized®, which is of particular value in healthcare settings."

ViuLite® is a privacy and shading solution comprised of a system of ScreenLine® blinds that are permanently sealed within a double-glazed cavity, which Unicel manufactures under license from Pellini SpA. ViuLite® ensures total protection against dirt, germs and weather conditions. ViuLite® provides protection from solar radiation and can quickly regulate the internal environmental lighting levels. Most recently, ViuLite® includes options for control devices that are treated with Sanitized® antimicrobial technology. The Sanitized® antimicrobial treatment ensures optimal cleanliness of the material.
