The ViuLite® SL20A insulating glass units are manufactured in accordance with high technical specifications and production standards. The slat **tilting only** function is achieved using rotational magnetic transmission through the glass thereby guaranteeing the unit's hermetic seal.

Slat

Aluminum, AA 6011-T8 alloy. Dimensions: width 1/2" (12.5mm), thickness 0.2mm. High-resistance polyester paint. The slats have a special treatment designed to eliminate possible emissions of chemical products inside the insulated glass unit, when exposed to ultraviolet and heat radiation i.e. non-fogging.

Internal cords

Thermo-fixed 100% polyester with internal core and excellent dimensional stability.
