

**Frame not included (for illustration purposes only)*

Available with:

- *Switch*

- *Remote Control*

The ViuLite® SL20M insulating glass units are manufactured in accordance with high technical specifications and production standards. The slat **tilting, lowering and raising** or **tilting-only** functions are achieved by an encoder motor that permits a constant speed resulting in a guaranteed synchronized function for multiple blinds. The motor and the electronic blind management system are positioned within the head rail on a slide which has a specially integrated electric socket with a snap-in connector to the spacer bar allowing connection to the external power supply via only three wires, thereby maintaining a complete hermetic seal to the unit.

Slat

Aluminum, AA 6011-T8 alloy. Dimensions: width 1/2" (12.5mm), thickness 0.2 mm. High-resistance polyester paint. The slats have a special treatment designed to eliminate possible emissions of chemical products inside the insulated glass unit, when exposed to ultraviolet and heat radiation i.e. non-fogging.

Internal cords

Thermo-fixed 100% polyester with internal core and excellent dimensional stability.
