### Available with:

- External Slider

---

The ViuLite® SL20S insulating glass units are manufactured in accordance with high technical specifications and production standards. The slat **tilting**, **lowering** and **raising** functions are achieved using a magnetic slider, placed on the right or left-hand edge of the glass. A narrow adhesive transparent profile ensures the linear movement of the slider. The blind is raised and lowered by moving the slider up or down and is tilted by slightly lifting or lowering the same slider.

### Slat

Aluminum, AA 6011-T8 alloy. Dimensions: width 1/2" (12.5mm), thickness 0.2 mm. High-resistance polyester paint. The slats have a special treatment designed to eliminate possible emissions of chemical products inside the insulated glass unit, when exposed to ultraviolet and heat radiation i.e. non-fogging.

### Internal cords

Thermo-fixed 100% polyester with internal core and excellent dimensional stability.
